WDD Abstract of [REDACTED]

25X1A

25X1C

INFORMATION CONCERNING ANTI-FRICTION-BEARING PRODUCTION AT THE DKF (10 pp; German; [REDACTED]
[REDACTED] date of info: prior to [REDACTED]; [REDACTED] document distributed on
17 July 1952) 25X1A 25X1C 25X1A

25X1X

[REDACTED] consists of information on the DKF (German Ball-Bearing Factory),
in Boehlitz-Ehrenberg, and is in three sections, as follows:

25X1A

1) 6-page list giving the explanations for abbreviations and symbols used to describe the
various types of special bearings produced at the DKF. Small diagrams of each type of special
bearing are shown, with the appropriate letter and number designation for each.

2) 2-page list which consists of the April 1952 work program for the grinding shop of the
DKF. Information given concerns the number and types of roller and tapered-roller bearings
scheduled for grinding.

3) Two blueprints, dated 13 and 31 March 1952, of bearings manufactured at the DKF:
a) self-aligning roller ring bearings; and b) tapered-roller ring bearings.
